

FOREST WALKS: Curug Benowo Tourism Reserve

Curug Benowo Tourism Reserve, just 10 minutes start from Hills Joglo Villa, is one of Central Java's best kept secret. On a busy day you may encounter less than 20 other walkers that are taking in this breathtaking beauty, including a 30 m high waterfall at the end of the trek- and the chance to sight the endangered Black Javan Lutung, *Trachypithecus auratus*.

We drive you to the starting point for the walk which is through typical Javan mountain villages and a mixed agro-forest of rambutan, durien and scented clove trees.

Hills Joglo Villa now has 45 species of resident bird species; most connected to populations in Curug Benowo, which has possibly twice that number of species.
