

Spending money

In the context of shopping and spending money, the verb **mengeluarkan** means 'to spend'.

In Learning Object 4 'Who buys the red scarf?' you saw the statement:

Ardi mengeluarkan Rp 65.000,-. Ardi **spent** 65,000 *rupiah*.

In the same context of shopping and spending, the verb **membayar** means 'to pay'.

For example:

Dia membayar Rp 70.000,-. He **paid** 70,000 *rupiah*.

The phrase **uang kembalian** means 'change'. This is the money a shop keeper gives you if you don't have the exact amount and offer more than is required.

For example:

Ardi mendapat uang kembalian Rp 5.000,-. Ardi received 5,000 *rupiah* in change.

You have learnt about numbers and shopping in previous worksheets. Use what you already know as well as the information given above to complete the exercises in this worksheet.

Exercises

1.

Read the sentences from a) to e) on Page 2 which state how much money various characters from 'New Land, New Language' gave to the sales assistant and how much change they received in return.

Then, say how much each person spent in total in complete Indonesian sentences.

Example:

Statement: *Ardi membeli sepatu. Dia membayar Rp 50.000,-. Dia mendapat uang kembalian Rp 5.000,-.*

Amount spent: *Ardi mengeluarkan Rp 45.000,-.*

- a) *Peter membeli baju renang. Dia membayar Rp 25.000,-. Dia mendapat uang kembalian Rp 5.000,-.*

Peter _____

- b) *Anna membeli kacamata hitam. Dia membayar Rp 40.000,-. Dia mendapat uang kembalian Rp 10.000,-.*

Anna _____

- c) *Ardi membeli botol air. Dia membayar Rp 20.000,-. Dia mendapat uang kembalian Rp 15.000,-.*

- d) *Nina membeli HP. Dia membayar Rp 500.000,-. Dia mendapat uang kembalian Rp 25.000,-.*

- e) *Pak Smart membeli komputer. Dia membayar Rp 7.000.000,-. Dia mendapat uang kembalian Rp 200.000,-.*

2.

Look at six receipts from Learning Object 6 'Who bought the pullover?' given below.

Then, read the statements a) to e) on Page 3.

Match each statement with its corresponding receipt. Write the number of the receipt on the line provided.

Hints:

In exercise 1, you were told how much each person gave to the shop assistant and how much change they received. In this exercise, you are told what each person's total expenditure was and the amount of change they received.

There are four people and six receipts. Some people have more than one receipt, so you will need to use your addition and subtraction skills as well as a process of elimination to find the matching receipts.

Be careful! These receipts do not belong to the same people as they did in the Learning Object.
