Sample answers:

- d) I think the two speakers are friends. One is passing by and the other is greeting him by asking him where he is going.
- e) No, Budi doesn't have to tell Tono where he is going because the question is probably just meant as a friendly greeting. So Budi doesn't have to give specific details.
- f) Budi probably gives more details because the speakers are friends and Budi may be open to the possibility of Tono wanting to join him. Maybe they have been to similar places together previously.
- g) I think once Budi tells Tono where he is going and what transport he is using, Budi will ask Tono if he wants to come along too. Or, Tono might ask Budi if he can go with him.
