- d) *Kanguru-kanguru itu jatuh ke bumi.*
- e) *Kanguru-kanguru itu melompat ke hutan.*

2.

You may have used strategies other than those given here. How successful were they? You might like to try some of these strategies if you did not include them in your answers.

Sample answers:

- I tried to guess unfamiliar words from the context.
- I underlined the question word in each question, for example: *apa, bagaimana, mana.*
- I tried to find which part of the text each question was referring to by looking for the same words as the ones in the question.
- In questions 1a, 1b, 1d and 1e, the question word comes after a verb. I looked for those verbs in the story and guessed that the word or words following the verb were the answers.
- I looked in a dictionary to confirm the meaning of these words and so was confident that I had answered the questions correctly.
