<p>Laura (25), Bookkeeper I run every morning for 30 minutes! My body needs that. In the office, I sit for the whole day in front of a computer. I used to have back problems – but these days I am fit. For breakfast I eat fresh fruit and muesli, and then in the office, yogurt or salad. The food from the canteen makes you fat!</p>	<p>Eva (16), Student I am in a volleyball club. That is great! We train twice a week and on Saturdays, we play against other clubs. Volleyball is super! In our clubhouse, we have a big fitness room – I work out there once a week too.</p>
<p>Alexa (35), Businesswoman I have a solarium at home and I like to use it in the evenings. That is good for my skin. I do not have time for regular sport. I run a small fruit and vegetable shop. Every day I have to work 10 hours and I have a lot of stress. That is why I still smoke. Next year I want to give it up. Maybe I will do some more sport then – perhaps swimming.</p>	<p>Michael (58), Early retiree For the last few years I have been a vegetarian. I used to be sick all the time – certainly because of my poor nutrition. Now I eat only vegetables, fruit and milk from organic growers in our region. I am slim again and have virtually no health problems. There is a sauna near here and I like going there every two weeks with friends.</p>
<p>Johannes (45), Former removalist I love sport. Every Saturday I watch at least 3 hours of it on TV. I am not allowed to be active, because I have back problems. Fifteen years as a furniture removalist! These days I work in an office, but I have put on 10 kilos from sitting. I want to give up smoking, because of the coughing. On Sundays, I always go for a short walk.</p>	<p>Tom (25), Salesperson Fitness? The most important thing in my life! At least three times a week: mountain biking, jogging, swimming, etc. Eating healthily is also important, but I like to eat well and go for beers with friends. At home, I hardly ever smoke any more. My girlfriend is a non-smoker. I used to play squash, but now I have knee problems.</p>
